- | | |
|-----------------------|---|
| 1988г. - | Field discovery |
| 1990 -1995г. - | Detailed Probing carried out,
6 exploring wells drilled |
| 1993г. - | Ga and condensate exploration, evaluation and
production license for 25 years issued. |
| 1996г. - | Reserves are approved with State Reserves Committee
at 3.2 million c m. of gas and 31 million tons of
condensate. |
| 1996г. - | Agreement on cooperation between Gasprom, Rosshelf,
Norsk Hydro, Fortum, Conoc, Total was signed. Term
of validity expired in Septembr, 2002. |
| 2000г. - | Russian Federation Law on Product Sharing
Agreement is Signed. |
| 2001г. - | Project on Stockman gas condensate field development
is worked out. |
| 2002г. - | JSC Sevmorneftegaz is established by Rosneft (50%)
and Gazprom (50%) The License for Stockman filed
development is Re-issued to JSC Sevmorneftegaz |

Sea Depth at Stockman field is 320 –340 m

GENERAL SCHEME ON STOCKMAN FIELD DEEPWATER OIL PRODUCTION⁸

Deepwater main pipelines

Stockman platform – Teriberka

Four lines 0 42` (1066.8 mm)

- Pipeline length Ø 565 км
- Pressure at platform - 18-19 MP
- Pressure at the coast - 6 MP

Onshore gas transport

Teriberka – Medvezhegorsk - Volkhov

Two lines Ø 1400 mm

- Pipeline Length - 1400 км.
- Compressor stations – 11

Teriberka – Medvezhegorsk – Vyborg

Two lines Ø 1100-1400 mm

- Pipeline Length - 1400 км.
- Compressor stations - 10
- Working pressure – 9.8 MP

STOCKMAN FIELD DEVELOPMENT VARIANT (One TLP platform and two SPAR platforms)
